\*Population estimates from DSHS Center for Health Statistics 2008 projections.

Counts are for unduplicated children, for child's first test during 2008.

Counts for elevated children based on unduplicated test result  $\geq 10$ mcg/dL, any sample type.

% Elevated is rate for elevated children among those tested.

% diagnostic is rate for children with elevated venous test among those tested.

Counts of 1-4 expressed as "< 5" to protect identity of children.
